Subject: RDG Consultation

Dear Andrew,

I fully support the intent of the consultation and the preferred option going forward. I think it important given the reference to improving safety performance contained in paragraph 1.2.c of the consultation document that the to be developed RDG terms of reference to be are explicit as to the basis on which the RDG will address issues where it is credible that decisions will have an impact on delivered safety performance and that the basis on which RDG will engage with RSSB is similarly explicit.

Yours sincerely

Aidan Nelson
